Please support HB 7218. All of our precious ones are counting on you - they are alive (as of now), but they are afraid. Let's all live less in fear of just one, aberrant, intentionally violent mass shooter. Let's live with less domestic rage, gun blood spilling. Let's protect our families from accidental gun injury and death in our homes. Let's make it much harder to end one's life with a gun.

After all we are all precious and our laws should evolve to respect that civilized fact.
