State of Connecticut
Judiciary Committee

Dear Judiciary Committee,

We urge you to oppose H.B. 7219 concerning ghost guns. There are already laws in effect that require guns to have serial numbers. This is a gun registry bill that will redefine the State's definition of a firearm to include unfinished "frames or lower receivers". This will also include frame or lower receiver blanks, casting or machined body that still requires further machining. Please enforce the laws we already have regarding serialized firearms. We urge you to oppose H.B. 7219.

Thank you,

Alan and Karin Blaschik
