

Testimony in favor of

H.B.7219/S.B.60

I am requesting your support of the above bill for the following reasons:

H.B. 7219 - Ghost guns do not belong in our society. Something so dangerous should never be allowed to be made and the inventors of the 3D printer should eliminate from their product the ability to build a ghost gun with the possibility of law suits to the companies for any harm or death caused by using a ghost gun. Ghost guns will end up in the black market

and in the hands of individuals intent on causing harm. This bill should be one of the easiest ones to reject and I think that the public should be very concerned about the groups and individuals that push support for this bill.

S.B. 60

I am requesting your support of the above for the following reason:

I am a member of the public that is concerned especially when I am with my children to see a gun being displayed in public . If they do not want to have to show their permit when requested by law enforcement then don't flaunt the gun and questions won't be asked. This bill is supported by Law Enforcement to keep the public safe and therefore it should have the support of our legislators.

Thank you
