

March 6, 2019

I am offering testimony in support of HB-7218 and HB-7219. These are critical measures to help protect our children from the tragedy of gun violence. As a mother of two, I ask Connecticut's elected officials to support Ethan's law to make sure lack of safe storage of firearms and ammunition is a legal matter as we are clearly unable to rely merely on our hope of common sense in protecting our children. And I support the full ban of ghost guns. All firearms should be responsibly owned and therefore marked properly and regulated. Connecticut should be a leader in the effort to protect families.
