Subject: Oppose Bills No. 60, No. 7218, No. 7219, No. 7223

No. 60. This bill would have people submit to illegal searches. Police officers would be put in danger and will have to take someone's firearm for their own safety. This will cause injury and law suits.

No. 7218. This bill goes too far. There are already laws about responsibility of firearm owners. Gun owners are already responsible to keep children away from firearms. No one should legislate exactly how this should happen in our homes. If your firearm is in your locked house or room the owner has secured their firearm.

No. 7219. Firearms built before 1968 do not have serial numbers. If you take one of these apart for repair you would not be able to reassemble it. Firearms such as black powder hunting rifles are generally brought in kits.

No. 7223. If a firearm is in your locked car and it is stolen you would be guilty of a felony. Small safes are no more secure than a locked car.
