Subject: HB7219 testimony

Hi, my name is Alexandria.

One year ago I forced into human trafficking. I was forced to service (AKA was raped by) multiple clients a day every single day until I escaped. The only reason I escaped was because I was able to manufacture a firearm in secret that allowed me to do so. It is for that reason that I wholeheartedly oppose HB7219. I am just one person, and there are millions of people like me who weren't as lucky as me. By pushing this bill, the Connecticut General Assembly is saying that people like me don't matter, that it's fine if god knows how many women have to continue being raped over and over and over every single day of their lives, so long as it means getting those few extra authoritarian brownie points.

If you stand at all for the right of women to not have to spend every single day of their lives like that, being raped ceaselessly by multiple men, then do not make it any harder than it already is for them to escape that life. Vote against HB7219.
