HB 7219 Concerning Ghost Guns March 6, 2019

Testimony

Another wasteful bill addressing a non existent problem. Will make it difficult to impossible to even make parts for guns. Where is the evidence of such a need? And a very important point: It will all but ban reassembling guns made pre-1968 because so many simply had no serial numbers. This alone will affect many thousands of legally made and legally owned pre 1968 guns in this state. Once again: Where is the demonstrated need for this bill? If bad guys want guns they buy them on the street or steal them. There are plenty of guns out there and little need to make parts and assemble their own. And do you really think that this law will stop any bad guy from assembling a gun? Really?

Oppose this useless and ill advised bill.

Thank you.
