Subject: Written testimony for upcoming hearing on gun bills

My name is Seth Walter, I live in South Windsor, Connecticut.

I am opposed to the bills SB No 60 and HB Nos 7218,7219, and 7223. I am not going to detail the problems with each one. I don't want the language fixed or more complex wording added to carve out additional exceptions, I don't want the bills at all.

Each one is an infringement on my second amendment rights. Each one whittles away a small piece of my freedom, combined, they take out a chunk of my liberty.

I am in support of the bills SB No 940 and HB Nos 5227 and 5870. These bills expand my liberty and restore freedoms that government should never have taken away from us.

I understand that some legislators are supportive and champion "common sense" ~~gun control~~ "gun violence prevention" laws. Some may not even believe in civilian firearm ownership. I urge all those legislators to learn about the Weimar Republic in Germany, the gun laws they passed, and how they ended up being used against the people of Germany. Look at our current state a civil discourse and the current Presidential administration. Understand what has happened in Venezuela just in the last 20 years. The people of this country are no different. Please, stop paving the road to Hell with your good intentions.

-Seth
