

Hello. I am writing to ask that you vote no on HB-7005. This is a clear overreaching of the state's authority and a violation of the separation of church and state. Over the course of almost 30 years, I have been selective on which vaccines I have allowed my children to receive. I am horrified at the thought that some legislative body, that knows nothing about my children, did not bring my children into the world, did not devote their lives raising them, did not decide where they would go to school or church etc, did not stay up with them when they were sick, did not pay for their braces or volleyball camp, but will decide what gets injected into them. Does this really make sense? Please vote against this bill.

Thank you.

Helen Albert
