

My name is Elise Emmi and I'm a lifelong resident of Connecticut. I have three children, all which I've chosen to vaccinate sparingly, if at all. I've done so using the Religious Exemption as my belief systems and qualified research does not agree with vaccines in general. To have this right removed would be detrimental to the lifelong welfare of my children. I urge the State Legislature to vote DOWN the HB 7005 Act.
Thank you for your time.
