

Hello, my name is Susan McGuinness Getzinger of Newtown and I am a constituent. I am writing to ask my Representative , Mitch Bolinsky, to OPPOSE H.B. 7005.

I oppose any legislation that would restrict a parent's right to religious vaccine exemptions. Medical professionals, including doctors, do not have the education and/or the understanding of religious beliefs to oppose these beliefs and/or try to take away or alter religious exemptions. They are speaking out of their jurisdiction when they oppose religious exemptions.

*This issue is important to me and my family because we are victims of adverse reactions from vaccinations and deal with those negative impacts daily.*

H.B. 7005 eliminates nurses as persons who may acknowledge religious objections to vaccination. The nurse/patient relationship must be kept intact.

It is a slippery slope when legislators modify religious vaccine exemptions. This bill could easily be modified to eliminate religious exemptions altogether.

There is no need to make it harder for people to assert religious exemptions to vaccination. The Connecticut vaccination rate is currently at 95.6%. The current law is working.

I urge Representative Bolinsky to oppose this bill and here are just some of the reasons why:

1) This legislation discriminates against families with sincere religious beliefs opposing the administration of one or more vaccines to their children. Nurses should not be removed as the people one can trust to confide in about religious beliefs and vaccination.

2) The Connecticut vaccination rate is currently above 96% for the 7 vaccines surveyed by the CDC. The existing religious exemption has not decreased rates and must be left intact. Religious and medical exemptions combined are at only 2.1%, which is on target to the national median of 1.8%.

3) The idea that unvaccinated individuals pose a health risk to others is unsupported in the medical literature. In fact, vaccinated individuals can pose greater risk to public health due to a process known as shedding. Scientific evidence demonstrates that individuals vaccinated with live virus vaccines such as MMR (measles, mumps and rubella), rotavirus, chicken pox, shingles and influenza can shed the virus for many weeks or months afterwards and infect the vaccinated and unvaccinated alike. <https://www.westonaprice.org/studies-show-that-vaccinated-individuals-spread-disease/>

4) The US Supreme Court recognizes vaccines to be "unavoidably unsafe" and to cause injury and death in some recipients. The US Government has paid out more that \$3 billion to the victims of vaccine injury. Hundreds of thousands have reported an adverse reaction to vaccination to VAERS. <http://www.cdc.gov/vaccinesafety/ensuringsafety/monitoring/vaers/>

5) Vaccine package inserts warn of the risk of brain damage, life-threatening allergy, and death and no one knows in advance whom a vaccine will harm. Usually the patients are never read or given the package inserts and often do not know they exist and are, therefore, unaware of the dangers and fatalities of vaccinations.

6) [Vaccine makers and the healthcare providers who administer them bear zero liability](#) for vaccine injuries and deaths. The vaccine manufactures reap all the profits from vaccines, without having to pay for any of the injuries or harm. Doctors do not inform their patients of any monetary gain they make from their compliance of meeting the insurance and/or the CDC vaccine schedule, hiding conflicts of interest which conflict with the hippocratic oath. If doctors and governments force injecting toxins into people, what else might people end up doing to one another under “the law”?

I urge you, Mr. Bolinsky, to oppose this bill.

Thank you for your consideration.

In the Sacred Heart of Jesus,

Susan McGuinness Getzinger
