

I am writing to express my opposition to the proposed bill re the removal of nurses and clergy to acknowledge parental consent for religious exemption for children's vaccinations.

I have been a registered nurse for more than 40 years and have seen first hand in my own child the harmful effects that vaccination can cause. My understanding is that for many people, vaccinations will cause no damaging effect. But for others, the unwanted effect can be devastating. Genetic testing can determine whether a child should or shouldn't receive vaccination but infants/children are not tested, nor would insurance pay for testing. So it becomes a game of Russian Roulette.

I encourage you to contact Dr. Kendra Becker ND in Waterford, CT and Dr. Amiram Katz, Neurologist in Orange, CT to learn more about the potential health devastation that can be caused due to vaccinations for some individuals. Please do not support the right for parents to choose.

Thank you.
