

Dear Elected Legislators,

I am writing regarding HB7005 and 5277 proposing changes and elimination of the religious exemption to vaccines.

I am very concerned regarding this proposal as it is a complete violation of church and state. Furthermore the proponents of the removal of an exemption are the very people that stand to gain financially (pharma, vaccine makers).

Furthermore with established neurological risks involved with certain vaccines such as HPV and influenza in the published medical literature- with risk, there should be a parental choice.

I hope that you do the right thing for our children and protect the religious exemption in our state of CT.

Sincerely,
Greg Rocchio
