

I am opposed to HB 7005

First and foremost, religious freedom is protected by the First Amendment. We are the Constitution State. Informed consent is a human right, a God given right.

The State cannot decide who and what is God, or what we put into our bodies. The church, nor the State, has ownership over our bodies. Our bodies, and that of our children, are in the image of God, as we see God, and we have the right to protect, and question medical procedures that we deem immoral and unsafe.

There are aborted fetal cells in vaccines. I object to all vaccines using aborted fetal cells, animal cells, heavy metals, and other toxic ingredients. I refuse to put these ingredients into myself, and my children. It is ungodly and unnatural.

I have every right to refuse for myself and my children, medical products like this: "M-M-R II has not been evaluated for carcinogenic or mutagenic potential, or potential to impair fertility." Merck MMR Vaccine Package Insert.

Vaccines are not always safe and effective. With my testimony I am including copies of the response from the recent case brought by, Informed Consent Action Network (ICAN) and Robert F. Kennedy Jr., who sued the United States government, and won regarding vaccine safety. According to a legal document entitled, "Mandate for Safer Childhood Vaccines," Health and Human Services (HHS) has openly admitted to not having filed any vaccine safety reports in over 30 years.

Informed consent is a human right. Not only protected by our relationship with God, but also by our Constitution.

Please oppose HB 7005 and protect our right to a religious exemption without discrimination or persecution.

Thank you,

Jennifer Shafer
