

I am in opposition to HB 7005 as it would restrict a parents right to Religious vaccine exemptions. I am also in opposition to to eliminations of nurses as persons who may acknowledge vaccine exemptions.

I do not believe it has been proven that unvaccinated people are a risk to other people.

Vaccines have not been proven to be safe. There is no need to eliminate exemptions for religious reasons. The vaccination rate is in fact very high in Connecticut. I actually feel that no-one should be forced to be vaccinated, child or adult. It will be proven in the future that the risks of vaccinations in general are far greater than we are being told, and it will be proven in the future that risks outweigh the benefits.
