

Dear Children's Committee,

I live in Hamden and I support HB7005 to allow vaccine exemptions require approval from clergy and remove nurses from the list.

As an aunt to a child battling leukemia with a compromised immune system, my nephew relies on herd immunity to stay healthy. Without 98% vaccination rates, that poses a serious life threatening risk to him. Please require all children and adults in public schools, private and public preschools to be up to date on all vaccinations.

Thank you,

Myla Wilson
