Subject: Minimum Wage

Hello

I do not believe raising the minimum wage to this level will be economically feasible for small businesses. This bill also assumes all individuals earning minimum wage is a single parent with children. Have there been any studies performed to identify the real demographic of who is earning minimum wage? Such as students, illegal immigrants, workers who choose to work part time, etc.

The tax burdens of the state are already moving business and individuals out of the state. This is another mechanism to detract from new business moving to Connecticut nor does it support economic growth in our state.

We have a new name to mirror our new image! Connecticut Housing Partners
formally Mutual Housing Association of SWCT, Inc.
