Subject: Connecticut minimum wage increase.

I make far more than the minimum wage.

Why would I be concerned about those who make less than \$15.00 ?

Two reasons :

When family income provides enough to put food on the table, provide modest housing for the family and pay for transportation to and from work - the need for tax dollars to subsidize employees is reduced. It comes at a small price to corporations like Wal*Mart and McDonalds who provide new employees with directions on how to apply for public assistance. Contrary to what those companies will tell you, the cost to their products will rise by a couple of cents.

Secondly, it is the right, just and moral thing to do.

Please vote in a way which reflects our values.
