

Hello,

I am an adoptee and I believe that EVERY person has the right to know information about themselves, their history. I am now 60 years old and STILL have a black hole, still don't know my "birth" family medical history, which also means that my daughters and granddaughters also do not know. I am asking you please...find it in your heart, put yourself in our shoes, and please vote for S.B. 972.

Thank you....

Lois
