

Support for S.B. 972

I am writing to urge you to please support and pass S.B. 972, for all adoptees being able to have access to their original birth certificates. This is very important to understanding each person's health risks. We know how many diseases are hereditary. Every time that you go to the doctor, you fill out a form that asks about risks in your family--heart disease, stroke, even eye diseases. Imagine if you don't have access to any of this information because they are not asking about your adopted parents, but your genetics, which you don't know and can't find out.

Please help vote to provide access to these records and pass S.B. 972.

Sincerely,

Linda Blum
