

**Support for S.B. 972**

To whom it may concern – I strongly support S.B. 972. My wife is an adoptee that has been trying to find out information about her birth parents for a long time and this bill would go a long way toward providing her the rights to information about her biological origins that she deserves to have. It would also enable her to access her original birth certificate like all other citizens are allowed to do. Please support this bill.

Sincerely,

Andrew Brown
