

SB 972

Support for SB 972

Please consider this bill and PASS it.

I am a biological parent who has been reunited with the baby I gave up in 1959. No one ever promised secrecy.

When the baby neared the age of 18, my wife wrote letters to Children's Services of Connecticut and ask that the letters be made available to her when she was 18. The letters were lost and not available to her.

Karen's mother allowed her to search, and her search was successful, however, during the search Karen traveled down many fruitless paths. But eventually there was discovery.

As times and opportunities became available extended family members have met to become a very important part of each one's life.

A few days after my wife and I had first met Karen, we realized something was different. And then suddenly we realized that something was the empty feeling inside. It was gone.

This bill SB 972 when enacted will eliminate one of those long and fruitless paths during the search.

So, I would ask again.

Please consider this bill and PASS it.

Thank you very much.

Donald Cummings
