

Support for S.B. 972

Being an adoptee has lead me to always wonder where I come from. Being able to reunite with my birth family has filled the void I have always had in my heart. Please allow Connecticut adoptees to have their birth certificates, it should be a civil right to have access to ones own records. It is the most confidential way for adoptees or birthparents to find each other, rather than a more intrusive way through DNA registries.
