

Please help support bill and pass S. B. 972!

I am a provider for adoptees and I believe everyone has a right to know where they came from and have access to their own personal information. This should be everyone's human right. I have seen adoptees and adoptive parents struggle with no knowledge of medical information. Every little bit of information to an adoptee is a lot.

Since I am not an adoptee I can't even begin to understand what that must be like to not have access to your own personal information.

Thank you for considering passing this bill. It would be so important to so many people.
