

To Whom It May Concern:

Please support S.B. 972. My husband is an adoptee born prior to 1983, and has no information about his biological parents due to the lack of access to his original birth certificate here in Connecticut. He has no family medical information as a result. I worry about the lack of information to protect his health, as well as the health of our children. All he has is the altered, falsified birth certificate that was created at the time of his adoption. This reality is unfair and disturbing. ALL adult adoptees in Connecticut should have access to their original birth certificate. I ask you to do the right thing and support this bill.
