

Committee Bill No. 5898 No Wrongful Deaths

You can fill in the blanks from the Oregon model stats that 1/3 changed their mind and did not use the lethal script It follows that 1/3 of the balance 66% also changed their mind but were forced to satisfy the facilitators. 1 in 5 were likely euthanized after changing their minds

The violating States must close this gap in the safety net and they know exactly how to repair the damage...there are no excuses only oppressive intentions.

There are eleven categories of wrongful deaths.

A wrong diagnosis

A wrong prognosis

Unaware of available treatments

No access to palliative care

Denied funding for medical treatment

Mentally ill at risk

Ableist judgement of "better off dead"

Bullying or coercion

Killed without request or while resisting

Social contagion of suicide

Not a rapid or peaceful death

PS: expect expansion of categories due to "category creep".

Respectfully,

Bradley Williams
