

Dear Members of the Public Health Committee -

I support this proposed bill for the right to die. As society moves away from being involved in devout religious practices coupled with the skyrocketing increase in medical expenses, it only makes sense to allow people who are terminally ill to die on their own terms. I often say that if I am ever diagnosed with Alzheimer's Disease, that my family members that I do not want to continue living. I know that the bill does not address this scenario, but hopefully it will in the future. I have never encountered a person that says they want to die a painful, drawn out death leaving their family drowning in medical bills. It does not make sense. Please pass this bill!
Thank you.
