

I am a concerned parent who exercises my right to vote. I am completely opposed to this mandate which seeks to take away my right to make decisions for my minor children. This mandate seeks to vaccinate all minors from a non-communicable disease with a vaccine that has over 60,000 reports of adverse events. I implore the committee to leave decisions, such as these, where they belong. These decisions belong with parents.

I have 3 children who are vaccinated because I chose to do so. No one should be able to administer any vaccine for my children, without my consent. That aside, there are too many adverse reactions, side effects and even death related to the HPV vaccine.

Thank you,
Donna Alfonzetti
