

I am not an anti-vaxxer. I have chosen to vaccinate my child and he is up to date, but that was my choice as a responsible parent making informed decisions for my underage, uninformed, impulsive and easily persuaded child. It concerns me that bills are being considered that will allow another adult to discuss healthcare with my child without my presence or consent.

Please do NOT vote yes on these bills

HB 7199 = The HPV (Gardasil) vaccine will be MANDATORY for boys girls to enter 9th grade.

2. SB 858 = Kids will get the HPV vaccine without parental consent.

3. SB-94 = Pharmacists can issue a vaccine to kids 12 and over .

Thank you for your consideration
