

Too whom it may concern;

My husband and I who have 3 young children, 8, 5 and 1 are strongly opposed to the following 3 bills:

HB 7199

SB 858

SB 94

We do not believe the government has a right in medical decisions for our children. This is big pharma at its finest and they have no place making decisions for someone else's children. I have long been against the Gardasil vaccine for personal reasons and never intended to give my children this vaccine as I don't see the risks outweigh the benefits.

Respectfully,
Eric and Jessica Casini
