

Vaccine choice is medical choice. I value the ability to make medical choices for my own children and myself. The government shouldn't be making these decisions for families. My children, my own and everyone in the USA deserves and depends on our freedom, freedom is important!

The 3 bills I'm AGAINST are as follows :

SB 858 - kids will get the HPV vaccine without parental consent

SB 94 - pharmacists can give the vaccine to anyone over 12 years old. So your 12 year old can walk into cvs and get asked if they want the vaccine without ever talking to the parent!

Children who cannot drive or live alone cannot be made to receive a vaccine they know nothing about with out the aid of parent consent . It is a parents job to research and decide based on their child's need whether or not their child should be vaccinated. Especially after 5 years of multiple vaccinations these children have already been given .

I request we maintain our freedom and ability to decide for our own children and ourselves.

Thank you kindly,

Cassandra 🌸
