

Esteemed Members of the Public Health Committee,

Thank you for allowing me the time to share my voice.

I'm writing today to **Oppose SB 94 An Act Allowing Pharmacists to Administer the Influenza Vaccine to Children 12 years and older**

The administering of a vaccine is a medical treatment and I as the parent should have consent. Lets say my child has an allergy or history of reaction to vaccines, how would the Pharmacist know this? It appears to me that there are more than enough qualified providers to administer this vaccine.

Thank you for your time,

Colleen Dolan
