

Dear Esteemed Public Health Committee Members,

I am writing to you to ask you to oppose bill **SB 94: AN ACT ALLOWING PHARMACISTS TO ADMINISTER THE INFLUENZA VACCINE TO CHILDREN TWELVE YEARS OF AGE AND OLDER.**

Please oppose this bill. While I highly respect the knowledge that a Pharmacist has, they do not know or have access to the child's medical history including allergies and reactions. They do not know if the child has had previous vaccine reactions or reactions to any other pharmaceutical medicine ingredient. Therefore they should NOT be allowed to vaccinate a minor child without the consent of the parent/parents or legal guardian. According to the National Childhood Vaccine Injury Act of 1986 all parents must be given the vaccine information statement for all vaccines being given to a minor child. It is not safe in any way to allow this to happen.

I am also asking you to please oppose **SB 858.**

**AN ACT CONCERNING THE PROPHYLACTIC TREATMENT OF MINORS FOR SEXUALLY TRANSMITTED DISEASES.**

I can say that I absolutely agree with the US Supreme Court when it says that vaccines are unavoidably unsafe and that they carry known risks and side effects. I personally know several young women that have had multiple hospital and doctor office visits for side effects from this vaccine, one was life threatening! According to VAERS reporting this vaccine has had over 60,000 reported adverse events and over 450 deaths and 2800 permanent disabilities. Multiple lawsuits are happening across the country as we speak. These injuries are financially crippling the families of those injured on top of physically crippling the patients.

Parents should be the ones making the medical decision of their minor children as they know the medical histories of their children. I have seen this vaccine destroy the athletic dreams of several people. They actually had to stop playing because the side effects were life threatening. This leads to depression and financial ruin. Other countries are removing this vaccine from use because they know the detrimental effects from it, illness and death. The USA needs to get on board with these realities. Mexico scientists have just found the cure for this virus. We need to invest time and study into this revelation instead of mandating a potentially life threatening vaccine. Our bodies, our choice and parental rights to determine what goes into the bodies of our minor children.

Thank you for your time and attention,

Donna Fiederlein
