

Hello,

I am a parent in Plainville Connecticut. The bills, HB 7199, SB 858, and SB-94, are in the best interest of our communities. Children should be allowed to get vaccines. Children should be protected from cancer. Children are being exposed to diseases that were almost eradicated because their parents have been misled and lied to. This protects our children. This protects infants and immunocompromised individuals. I completely am in support of these bills.

Also, to support my beliefs, I am including news articles and journals that link to safety studies and evidence-based, peer reviewed studies.
