

Dear Public Health Committee,

As a very concerned parent I am writing you to **OPPOSE the passage of HB 7199, SB 858 and SB 94**. This bill puts in jeopardy my parental rights. I am not an anti-vaxxer. In fact, my 11 year old daughter is currently up to date with all of the other vaccines that are recommended, however I am very much opposed to The HPV (Gardasil) vaccine becoming MANDATORY for both boys and girls prior to entering 9th grade. Based on the extensive research I have done I do not feel comfortable with this vaccine for a number of reasons. There have been many issues reported with this vaccine. In addition:

- Kids should not be able to get the HPV vaccine without parental consent per bill SB858.

-Per SB-94 pharmacists will be able to issue a vaccine to kids 12 and over (this means if bill #2 passes, my child can go get a drink at CVS and be asked if she wants a vaccine despite her understanding the risks!

- As a parent I should have the right to direct the care of my child as I see fit vs. Big Pharma and the Government mandating what is best for my child or rather what is best for Big Pharma.

-Why will this be a requirement when HPV can't be caught while sitting in a classroom. My child will NOT catch HPV by attending school therefore how can this be a requirement?

- There is ZERO compelling state interest for this bill, other than it feeds lots of **\$ \$ \$** to Pharma. The HPV vaccine is the most profit-yielding vaccine on the market which concerns me greatly.

- It's also one of the most dangerous vaccines on the market, causing death, infertility, seizures, paralysis, etc. The CDC's Vaccine Adverse Event Reporting System (VAERS) has had 406 deaths attributed to the HPV vaccine so far and that number will only grow.

- I have a problem that this will be mandated but if something happens to my child, it's on ME, the PARENT to pick up the pieces, emotionally, financially and logistically. Even though the government will be forcing it, and trying to administer it behind our backs we WILL-NOT be able to sue the manufacturer if our child dies or is injured despite being forced into "allowing" this vaccine.

I never write letters but THIS IS NOT SOMETHING TO BE IGNORED. Please **OPPOSE the passage of HB 7199, SB 858 and SB 94!!**

Best,

Rebecca Johnston
