

Good evening esteemed members of Connecticut's Public Health Committee,

I am writing in opposition of Raised S.B. No. 94 - AN ACT ALLOWING PHARMACISTS TO ADMINISTER THE INFLUENZA VACCINE TO CHILDREN TWELVE YEARS OF AGE AND OLDER

Why does a pharmacist need to administer a vaccine to a child? Isn't that what a pediatrician is for? How does a pharmacist know the medical history of a child if they are not their primary care provider? This is a dangerous bill.

Please OPPOSE this bill and keep the act of vaccination in the primary care physician's hands, particularly for children.

Sincerely,

George Kavanagh
