

PUBLIC TESTIMONY before the Public Health Committee 2/25/19  
from Isabelle Menozzi, Roxbury, CT,  
**IN OPPOSITION to SB 94-An Act Allowing Pharmacists to Administer the  
Influenza Vaccine to Children Twelve Years and Older.**

Distinguished committee members, I want to thank you for this opportunity to address SB 94

I am a parent, a Certified Health Coach and a health freedom advocate. I care deeply about the health and wellness of my community and beyond. I frequently educate and empower people to lead healthier lives by creating a non toxic environment. For the past 10 years my focus has been to research extensively nutritional and environmental science. Through this work I discovered the deep complexities of the pharmaceutical and giant chemical manufacturers.

I oppose this bill because of legislative creep will allow this to happen without parental knowledge or consent. This is very dangerous, outright a violation of my constitutional rights and a violation of the 1986 National Childhood Vaccine Injury Act, which states that parents must be provided with a VIS statement and must give Informed Consent prior to any medical interventions. The purpose of this bill is to reduce the costs to the state and expand access to the administration of the influenza vaccine for minors. Really!???

As we watch the health decline of so many people around us, the reality of our health is that the United States is [sicker than ever](#).

The [U.S. spends more than any other country on healthcare](#) yet has more chronic health issues than any other country. Half of all adults in the [U.S. have a chronic illness](#), and nearly half will eventually die of cancer. Alzheimer rates and other neurodegenerative disorders are skyrocketing. What is going on?

States have allowed the influence of corporations to poison this planet and its inhabitants. Just as [Monsanto knew](#) that their product RoundUp causes cancer and failed to disclose it, heads of pharmaceutical and health agencies who are responsible for vaccine safety such as WHO, HHS, CDC, FDA, NIH and HRSA knew that vaccines had not been [properly tested, ever](#) .

We all know that the pharmaceutical industry spends enormous amounts of money on [lobbying](#). More Than 100 Bills Proposed in 30 States To Expand, Restrict or Eliminate Fundamental Human and Constitutional rights all in the name of Big Pharma. Vaccine Informed Consent Rights.

Laws supporting these giant companies start right here, in State Houses. Allow me to be blunt here, we have a giant corporation takeover in this country, and in this world. **WE DEMAND A SEPARATION OF PHARMA AND STATE!**

It is pretty clear that the agenda is to sell more and more vaccines, [300 new ones in the pipeline](#). With mandates, insurance quotas and other systematic bureaucracy this will ensure a successful market for all the government and Pharma. I know, deep in your hearts, you know this is wrong. I am sure many of you went into this career to create a better state for the citizens. Please work for us, the people, not the corporations.

This bill is outrageous in so many ways and I am appalled at the attempt once again to remove parental rights over a very important medical decision for our children.

I know, we all want the best for our children and we need to start by having good science and a clean regulatory process. We do not have this now.

Will the Constitution State protect our First Freedoms? Be on the right side of history, do not be complicit into crimes against humanity. **Say no to all vaccine mandates and separate pharma and state.**

Thank you for your service

Isabelle Menozzi  
Roxbury, CT

3. Recently a top government expert witness, Dr. Andrew Zimmerman, offered a sworn testimony stating that he privately told DOJ attorneys in 2007 that he DID find that a certain subset of children were prone to developing symptoms regressive autism after routine vaccinations. He **was immediately let go from his position**, and his statement never saw the light of day until almost 12 years later (2019) See that here in a 10 minute video clip: <http://fullmeasure.news/news/cover-story/the-vaccination-debate>
4. Robert F Kennedy Jr. is requesting an investigation within the Office of the Inspector General with regard to these events.
