

Dear Public Health Committee Members:

I am strongly advocating that you OPPOSE SB 858 and SB 94. Parents should be involved with treatment and consent concerning preventative medication and/or vaccinations for sexually transmitted diseases. The HPV vaccine is a dangerous vaccine with many adverse reactions. Japan, France, and India have banned this vaccine from usage. Why would you be proposing this treatment which takes away parental rights? This is an overreach of the government, and infringes upon my religious faith.

Please **listen** to your constituents and stop adding bills which cause harm and take away rights. Please listen to their personal stories about the suffering that their families have endured from following the ever-increasing mandate of vaccines. It's time to reverse course, and acknowledge the stories you hear, and do something about them. It's time to renew the health of children in this state. These two bills do not do this. Therefore, please oppose them.

John 3:11

¹¹ Truly, truly, I say to you, we speak of what we know, and bear witness to what we have seen, but you do not receive our testimony.

Thank you for your consideration. Joan Nogueira, Fairfield County
