

Dear Public Health Committee member,

I would like to voice my opposition for the bill SB 94.

I believe that minors (even over the age of 12) are not mature enough to make this type of medical decision.

I'm not comfortable with the fact that no parental consent would be needed for the Influenza vaccine to be administered to a minor.

Please, I'm asking you to oppose this bill!

Thank you,

Julia Orozco
Stamford, CT
