

I am writing to strongly oppose SB 858, and SB 94. I am against mandated vaccinations and cannot find ANY reason that any medical treatment should be allowed without Parental consent. Gardasil has been documented to have killed and severely handicapped MANY girls. Likewise I find the option of having Pharmacists administering flu vaccines to children to be an unnecessary risk that should not be taken. PLEASE oppose both of these bills for the safety of all children involved.

Thank you,

Leslie Roberts
