

Dear Sir/Madam:

I would to strongly push that Tweed runway be extended. Note that every 1,000 ft extension would add 10,000 lbs load for a 737 - that's another 30 or 40 passengers who will not need to be bumped while the plane takes off without them on warm days or with a wet runway. at the 80bd noise cone for a 737, our neighbors dog barks louder.

We are a New Haven tech company that has grown from six to sixty since 2011. We are looking to expand and plan to add another 20 employees his year. **We are forced to open an office in Chicago** where we plan to base half these people and look to grow our Chicago office more next year.

Our customers are all over the US. Flights to Atlanta and Chicago would change our plans. There is plenty of talent here that leaves for jobs elsewhere and every little bit we can do helps.

Thank you for your consideration.
