

I am an advocate and user of many of the rails to trails in New England, but against the proposed loop trail. This type of trail has not been popular or widely used where they have been constructed. To say business will spring up along it is a real stretch! It hasn't happened on the most widely used trails and even more unlikely on the proposed trail Using it to go to work would be rare as they are not plowed in the winter and dangerous after dark.

I would have liked to make a more thorough response, but due to the short notice and weather. this will have to do.

How about focusing on keeping taxes low so more people especially seniors can afford to retire in CT.
