

To Whom may concern:

I would like to add my support to the proposed bill SB775 that supports the 111 mile route through central CT. This type of infrastructure is vital for the people of Connecticut. It will provide another source of outdoor space for recreation and transportation.

I have been involved with the upgrading of the Air Line Trail section that runs through our town of Lebanon. It provides a safe area to commute and enjoy nature. I personally use this trail and the surrounding trails for recreation, fitness, errands and transportation.

This type of infrastructure is used by more and more people as they become aware of the value of such an area.

Thank You,
