OLR Bill Analysis

HB 7182 (as amended by House "A")*

**AN ACT CONCERNING CERTAIN ALCOHOLIC BEVERAGE MACHINES.**

**SUMMARY**

This bill allows alcoholic liquor permittees authorized to serve alcohol for on-premises consumption to use an automated machine to serve beer, cider with up to 6% alcohol by volume, and wine.

Under the bill, the automated machine, upon the permittee's activation of a payment card, may be operated to dispense beer, cider, and wine to a (1) permittee's employee who is authorized to serve alcohol or (2) person the permittee, or presumably his or her employee, has verified to be age 21 or older who shows a government-issued identification card that matches the name on the payment card. The permittee or employee must record the verification that the person is at least age 21.

Under the bill, automated machines cannot dispense a serving of more than 32 ounces of beer or cider or 10 ounces of wine before the permittee or employee must reactivate the payment card.

The bill requires the Department of Consumer Protection (DCP) to amend its regulations by October 1, 2019 to (1) allow permittees and their employees to use automated machines to dispense beer, cider, and wine pursuant to the bill; (2) ensure that automated machines do not initially dispense more than one drink at a time; and (3) ensure that a person is only allowed subsequent automated servings after he or she has substantially disposed of or consumed the previous serving.

Current regulations prohibit the use of an alcoholic liquor self-service system, where a customer serves himself or herself, except as allowed under a hotel guest bar permit (Conn. Agencies Reg., 30-6-A28(c)).
“House Amendment “A” adds the provision requiring DCP to amend its regulations.
