Dear, Environmental committee, Senator Cohen, Representative Demicco, Senator Kushner, Representative Gresko, and distinguished members of the Environment Committee

I am writing to you about the SB 1003 which is a plastic bag ban for the state of CT. My class and I support this ban because by using plastic bags we are putting our environment at risk. For example 1.6 billion gallons of oil are used to make plastic bags each year. This is a huge factor to pollution and the greenhouse effect. This results in global warming. Not only do these bags cause pollution but they also are responsible for the deaths of many animals such as turtles because they end up in oceans and are mistaken for jellyfish. As you can see these bags cause some serious issues and we need to take action now.

Sincerely,

Zachery
