

Dear Legislators,

I support HB5104 and as your constituent request that you do the same. African Elephants, Lions, Leopards, Black Rhinoceros, White Rhinoceros and Giraffes are all considered endangered or threatened except for the giraffe, which is considered "vulnerable to extinction." The overwhelming majority of CT residents strongly support policies to save imperiled animals from needless slaughter, including trophy hunting, poaching and wildlife trafficking. Trophy hunting is the opposite of what CT want. Do the right thing and support HB5104.

Sincerely,

Rachel Coogan
