My name is Ross Marble, I am a father of 5 who is against the plan to further burden me in exercising my constitutionally protected rights. The very idea that charging the law abiding citizens an additional punishment tax is going to solve crime is ludicrous, and insults the intelligence of anyone who is even remotely aware of the relationship between tax, and crime. I for one am tired of being the scape goat and whipping boy for the failure of the legislature to balance budgets, and practice meaningful crime reduction strategies. Please put those who are predators of the law abiding in prison, and stop attacking those of us who work, pay our taxes, raise our children, and try to make our communities a better place to live in.
