AARP is a nonpartisan, social mission organization that advocates for individuals age 50 and older. We have a membership of 38 million nationwide and nearly 600,000 in Connecticut. We advocate at the state and federal level for policies that protect and enhance civic engagement and individual empowerment.

AARP supports Automatic Voter Registration, as laid out in Sections 4 and 5 of Raised Senate Bill #233.

AARP encourages the Legislature to adopt fair, simple, and readily accessible voter registration procedures that fully comply with the National Voter Registration Act. In addition to Automatic Voter Registration, AARP supports improving voter access and maximizing participation. Our policy includes support for:

- Adopting a minimum early voting standard of at least 15 days of no less than four uniform hours each day in publicly accessible sites;
- Setting standards for the number of voting machines and elections workers to help avoid long voter lines; and
- Accepting voter pre-registration of 16 & 17 year olds.
