

To members of the Human Services Committee.

I am a resident of Haddam Neck, CT. I am proud of how our state continues to stand up for all people, not just the wealthy. Health care is a human right, and all people need and deserve equal access to sexual and reproductive health care. Without the Title X program, many patients will lose access to free or low-cost basic care like birth control, STI/STD testing, and cancer screenings. Connecticut must act to ensure all residents can continue to access comprehensive reproductive health care services at PPSNE and other family planning providers. Thank you.

Sincerely,

Sandra Olsen
