My name is Ann Metzger.

I work in the mental health and addiction field. Everyday I see patients who need services in inpatient units but the wait to go inpatient or residential can take so long that patients generally can't stay sober long enough to get the proper treatment. These patients need treatment the second they are ready to receive it. The lack of beds is costing people to lose there lives. Please help!

I am urging you to consider these bills to ensure insurance companies are required to provide help to those seeking services and to utilize MAT as a standard form of treatment, the data suggests this is one of the most successful ways to help those recovering from addiction.
